

TECHNOLOGIES

OVERVIEW

SINGLEForm supervises company's work processes and staff with early warning and alerts; It provides a paperless environment that securely collects and remits accurate data for many of client business needs with existing system. Due to lack of Data Management and processing and existing database inabilities the system had crashes. Agency came to us with the system in terms of enormous Employee data Management, I-9 form, Background verification management and to fill the existing system level gap they agency was facing.
