

TECHNOLOGIES

OVERVIEW

We developed Cosmos Granite and Marble web and mobile app, where customer can buy the natural Stone, Quartz, Tile services that one can easily rely upon, it shows the 14 location marbles, granite stock availability information through this portal. Client also wanted to show the specific product category / subcategory those are in stock in other associated location. To pull this information to different location we have created the SOAP API, though which we update the status of in stock inventory in our system using the onetime cron job.

INDUSTRY
Stone

LOCATION
Dallas Texas

CLIENT
Cosmos

PROJECT SUMMARY HIGHLIGHTS – PORTAL DESIGN & DEVELOPMENT

- Create Multi vender website to sell the Natural stone world wide
- All vendors can manage their profile information / product inventory management using separate logins.
- Multi admin portal to manage the marbles, granite stock which include – Super Admin and Location Admin, site admin to maintain the product details on application from backend.
- Created the SOAP API, though which we update the status of in stock inventory in system
- Responsive and optimized for viewing on mobile devices.
- user can check the marble and granite in stock availability from 14 associated locations, one at a time through this portal.
- created mobile application for mobile user to get information through the apps as well.
