PROJECT SUMMARY HIGHLIGHTS – PORTAL DESIGN & DEVELOPMENT

- An Open Source ecommerce portal was developed with WordPress and Synchronized JS for faster user experience.
- Manage the menu items and Online order activities for different locations
- Created the custom section to manage and generate the fine reports and identify the sells per day/month/year wise.
- Updating in stock and out of stock / real time inventory management
- Mock-up Creation and Design Implementation
- Responsive and optimized for viewing on mobile devices.
- Added a customized Blog section to show the different Blog posts.
- Increase overall number of delivery in short span and takeout orders through the online customize pillow/mattress ordering system
