OVERVIEW

Terratino is the real estate and rental marketplace that serves the full lifecycle of owning and living in a home: buying, selling, renting, financing, homes for rent, as well as estimate home values, Rent estimates and other home-related information. Client was having challenges getting sales due to stiff competition and economy changes, we develop this web portal which has a user friendly interface so it is easy and simple to use and provided an easier and better way to search the properties by using various filters leading to a solution for our client.
